## Explanation of Effort and Availability of Commercial Equipment

\*Provide an explanation of efforts undertaken, and challenges encountered, in permanently removing, replacing, and disposing of covered communications equipment or service.

PocketiNet has received ONT/OLT equipment and has replaced 100% of that equipment. We received microwave equipment and have replaced 100% of the links. We received core routers and switching and are currently in the process configuring and replacing equipment. We have completed ~30-40% of the core routers and switches. All the removed equipment has been inventoried, stored securely, as we complete the final few hardware replacements and will then be shipped for disposal.

\*Explain whether you are finding commercially available equipment in the marketplace. If not, then explain efforts taken to obtain replacement equipment.

We are finding commercially available equipment in the marketplace. We have ordered the bulk of our equipment at this point.

\* If there is additional information relevant to the preceding questions or that you believe the Commission should be aware of, please include the information below.

We have experienced a delay in router and switch completion because of a order that should have been a like-for-like replacement didn't include expansions cards for multiple switches. We haven't been able to dedicate the needed resources due to a unforeseen issue at no fault of PocketiNet that we had to vacate our largest fixed wireless tower shelter by the end of year. Because of these factors we applied for another extension which we fell will allow us to complete the final equipment replacements while preventing potential outages for our customers as a result of not taking the proper time to plan and complete the hardware replacement trying to race to complete everything before the previous deadline.
