## Explanation of Effort and Availability of Commercial Equipment

\*Provide an explanation of efforts undertaken, and challenges encountered, in permanently removing, replacing, and disposing of covered communications equipment or service.

Yes, my company has conducted work on the removal of covered equipment since submittal of the last form. We have removed equipment from 3 sites for a total of 31 of 142. Removal is not our focus because of lack of funds but some equipment had to be removed before we could place the new equipment. No, my company has not conducted work on the disposal of covered equipment since the submittal of the last form. There are not sufficient funds. Pine is focusing on replacing equipment. Yes, my company has conducted work on the replacement of covered equipment and services since the submittal of the last form. 4 sites were replaced for a total of 74 of 142. This is moving very slowly since Pine does not have funds to hire contractors for the replacement of equipment.

\*Explain whether you are finding commercially available equipment in the marketplace. If not, then explain efforts taken to obtain replacement equipment.

We are finding that some equipment and services are commercially available, and some are not. Because of the cost of services Pine has to do most of the services internally. Pine Telephone has elected to move design, installation, provisioning, integration, site validation, and testing in-house. Moving these services in-house allows Pine Telephone to cut down on costs and use this savings on other parts of the project. Pine is currently seeing a delay of between 3-6 months in between purchase and delivery of equipment.

\* If there is additional information relevant to the preceding questions or that you believe the Commission should be aware of, please include the information below.

Because of lack of funds Pine is requesting extensions this is adding a great deal of time and cost to the project. Because of the drawn out timeline Pine is having to go back to sites 3 to 4 more times than is necessary which greatly adds to the cost. Pine Telephone is hopeful to remove equipment at 6 sites in Q1 2025. Pine Telephone is storing the removed covered equipment at a central location owned by Pine Telephone. Should additional program funds become available, Pine hopes that a blanked extension will be applied to the program, to allow all applicants the chance to reassess their plans and put them in motion. Pine is currently seeing a delay of between 3-6 months in between purchase and delivery of equipment.
